Sport Pilot Program a success at Stanton Airfield

We began 2006 with an initiative to test the waters in the new Sport Pilot and Light Sport Aircraft (LSA) areas of aviation. After placing an order for our own LSA, which would take months to arrive, we leased a Flight Design CT (Composite Technology) this spring and began training pilots. It has been a great success and we likely will log over 300 CT hours in 2006 and have trained over a dozen pilots in the CT. Above, Kent Johnson-CFI, poses with student Ingrid Freeman of Northfield after her first solo flight. She had a great flight and loves flying at Stanton.

Recently we have received our own 2006 CT from the factory and will be using it as the primary aircraft for Sport Pilot instruction going forward. We have also become a primary repair facility for CTs in the area, as well as are becoming an assembly station new CTs arriving from Europe; all very good business for the airfield.

Stanton L33 glider is for Sale

Our nice LET L33 glider hasn't gotten much use since being acquired so the decision was made to sell it and use the money in other areas. It is a wonderful intermediate glider and is in nearly factory new condition. If you know of anyone interested please have them contact the airport. Full details are on the SYN website.

Great gift for GUYS!

Glider Ride

Gift Certificates

- Sightseeing \$99
- Adventure \$115
- Mile High \$145

Fantastic Christmas gift!
